Profile

Results-driven **MERN Stack Developer** with over 4 years of industry experience and strong proficiency in **JavaScript**, **Node.js**, **React**, **Next.js**, **Express.js**, **MongoDB**, and **Git**. Skilled in building scalable web applications and systems for **HR**, **e-commerce**, **document management**, and **data management**. Adept at developing both frontend interfaces and backend architectures with a focus on clean, efficient code. Passionate about **continuous learning** and contributing to innovative, real-world software solutions within dynamic development teams.

Work Experiences

Full Stack Developer | Infar Technologies, Freelance | Nov 2024 – Present

- Developed a responsive online clothing store with admin dashboard for managing products and orders.
- Built and deployed care home websites for UK clients with focus on accessibility and performance.
- Created admin dashboards for analytics, order tracking, and user management.
- Used GitLab for version control and Vercel for CI/CD deployment.
- Ensured clean code, fast loading, and mobile optimization across projects.

Software Engineer | Rookie Ninja General Trading LLC, Dubai | Aug 2022 – Oct 2023

- Delivered corporate websites using React.js and Next.js with optimized performance.
- Designed and built an in-house HRMS to streamline HR operations.
- Created a multi-seller e-commerce platform for improved business workflows.
- Built a Document Management System (DMS) to enhance internal file handling and workflow.
- Ensured clean code, responsive UI, and performance optimization across all projects.

Junior Software Developer | Paripoorna Software Solution Service, Remote | May 2021 – Oct 2021

- Built a discount app with features like login, location-based store search, and coupon redemption.
- Created a COVID-19 testing platform with lab search, appointment booking, payment, and result delivery.
- Created secure backend routes using Node.js and Express with JWT-based auth.
- Handled CRUD operations and data integration using MongoDB and Mongoose.
- Conducted unit testing, API testing using Postman, and participated in code reviews within team-based projects.
- Developed websites for external client requirements using modern web technologies.

Trainee Software Developer | Packapeer Academy, Calicut | Jan 2020 – Feb 2021

- Learned and applied MERN stack through practical live projects.
- Developed multiple personal projects including a matrimony website, online salon booking system, and e-commerce platform.
- Developed robust user login/registration with authorization controls and encrypted credentials.
- Designed optimized CRUD operations with validation, error handling, and efficient database interaction.
- Collaborated in team-based project sprints and participated in peer reviews.
- Used Git for version control and GitHub Pages for project hosting.

Core Competencies & Skills

- **Frontend Development** – React.js, Next.js, HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, MUI
- **Backend Development** – Node.js, Express.js, MongoDB, MySQL
- **Version Control & Deployment** – Git, GitHub, Vercel, Gitlab
- **UI/UX Design Tools** – Figma (basic prototyping)
- **Payment Integration** – Stripe
- **Development Practices** – MVC Architecture, Agile/Scrum, API Integration
- **Softwares & Tools** – Visual Studio Code, Postman, Chrome DevTools

Projects

Ninja Resources (HRMS)

- HRMS web application for streamlined employee management, including details, attendance, leave, and IT asset tracking. Developed for internal use by Rookie Ninja and its affiliates to manage multiple companies and locations from a unified dashboard.
- Stack: Node.js with Express, MongoDB, Redis (backend) and React (frontend)

Multi-Seller E-commerce Platform

- Built an enterprise platform with multi-role support (customers, sellers, logistics, finance, admins) for selling IT and electronic products across the Middle East and Africa. Project on hold due to legal issues.
- Stack: Node.js, Express, MongoDB, Redis, React, Next.js, Nginx, Docker, AWS

Saanvira Clothing Store (E-commerce Platform) | [saanvira.https://saanvira.com/](https://saanvira.com/)

- Developed a full-stack multi-vendor clothing store with real-time inventory tracking, stitching unit management, promotions, and admin dashboard for end-to-end operations.
- Stack: React.js, Next.js, Redux, Tailwind CSS, Node.js, Express, MongoDB

Kas Pake App | Web: <https://kaspake.mu/>

- Retail discount app with brand/category offers, store tracking, and admin panel.
- Stack: Node.js, Express.js, MSSQL

WorkSiteLabs | worksitelabs.com

- COVID-19 testing portal with appointment scheduling, lab search, and result delivery.
- **Stack:** Node.js, Express, Firebase, React.js.

Education

- **Bachelor of Technology (B.Tech)** – College of Engineering & Management, Punnapra | 2013 – 2017
- **Higher Secondary Education** – National HSS, Engandiyur | 2011 – 2013

Personal Information

- Location: Thrissur, Kerala, India
- Nationality: Indian
- Languages: English | Malayalam | Hindi
